Often a PhD thesis for some reason cannot be published immediately. In the years that follow, the authors do not find the time to revise the manuscript as they wanted. This in turn causes problems because new literature appears or the evidence of new sources needs to be incorporated. As a result, the manuscript often remains unpublished and the valuable insights risk to be inaccessible and thus lost for scholarship.

To prevent this, Trismegistos Online Publications have decided to open up a new 'Special Series', where valuable PhD theses or other scholarly manuscripts can be published with an ISBN number.

Contributors can send in manuscripts in Word or PDF format to mark.depauw@kuleuven.be. The editors will consult experts about the quality of the manuscript without taking into account whether it is abreast of the most recent scholarly literature or developments.

This volume is dedicated to the memory of

William O'Sullivan

manuscript keeper of Trinity College Dublin
(27 January 1921 - 31 December 2000)

Introduction

In the winter of 1889-1890 William Matthew Flinders Petrie excavated a Ptolemaic necropolis in Gurob in the Fayum and he found hundreds of papyri reworked as mummy cartonnage. The Greek papyri were divided between the British Library, the Bodleian Library and Trinity College Dublin. The demotic papyri were left to the Ashmolean library, where they were to be studied by Francis Llewellyn Griffith. The edition of the Greek papyri, begun by Archibald H. Sayce, was attributed to John P. Mahaffy (1839-1919)¹, who published two volumes in 1891 and 1893 (P. Petrie I and II). The third volume followed in 1905, with as editors Mahaffy and Smyly, though it was largely the work of Josiah Gilbert Smyly (1867-1948)², who also edited a separate group of texts of the same origin as P. Gurob. Though Mahaffy stated in the introduction that the third volume intended to "gather up the fragments that remain, that nothing be lost", P. Petrie III, which recapitulates the documentary texts of vol. I and II with numerous corrections (and a complicated numbering), was the largest of the three volumes and contains several complete texts of a type that Mahaffy did not consider interesting, e.g. lists and accounts. All fragments remaining after the publication are now kept at Trinity College Dublin.

In 1972 Edmond Van 't Dack announced a plan for a full (re)publication of all papyri found at Gurob by Petrie,³ of which thus far only a few volumes have seen the light, mainly P. Petrie Wills (= P. Petrie² 1) by Willy Clarysse (1991), P. Petrie Kleon by Bart Van Beek (2017) and the tax lists, both Greek and demotic, by Willy Clarysse and Dorothy J. Thompson in P. Count. (2006). A few surety contracts are published by Willy Clarysse and Marie-Pierre Chaufray in the recent Festschrift for Peter van Minnen (P. L. Bat. 40, 2023). Transcripts by Clarysse of all Greek papyri, published and unpublished, are available in Leuven and I hope that the ancient history department will one day find a person who will continue this work, for which I now no longer have the energy.

After the publication of P. Petrie III, Smyly continued to work on the papyrus fragments preserved in Dublin. He grouped more than 150 mostly fragmentary texts and transcribed them in a notebook, registered in Dublin as Cahier 3231 (formerly Cahier R.2.9), with as title "Transcriptions of papyri". Part of them were included in the unpublished MA dissertation by Paul Vanaverbeke (1946-1998), *Bijdrage tot de studie van de P. Petrie ined. (Papyri Trinity College Dublin)*, Leuven, 1968 [a copy of this work is available in the

university library in Leuven]. Other fragments of cahier 3231, belonging to the Kleon archive (TM Arch 122, ca. 260-236 BC) were incorporated by Clarysse's MA dissertation, *Bijdrage tot de studie van het Kleon-archief*, Leuven, 1969 and later in Bart Van Beek's edition of P. Petrie Kleon (**4, 16, 34, 41-42, 45, 55, 56, 66, 67, 77, 80, 82, 84, 105, 106, 108, 110, 120, 120a, 127, 145**); these are not republished here, but references are given to the photographs online. A few items which were not included in the edition of Van Beek may well belong to the Kleon archive as well, though the arguments for inclusion were considered indecisive (**5, 13+14, 35, 36, 42, 58, 60, 64, 69, 143**). When studying the originals in 1970-1972 Clarysse joined several fragments to each other or to some of the published Petrie papyri. An example of such join has been published by Gert Baetens in *Ancient Society* 44 (2014), p. 91-104 (fragments **30, 37, 54** and **112** all belonging to the same petition). I hope that the present publication may allow others to make more joins with the published Petrie papyri and that in this way the fragments may become valuable for further research. Hundreds of other fragments remain unpublished to this day. Eighty-five were grouped by Smyly in two "Select Boxes" (mixed up with some papyri from Petrie's excavations in Rifeh); 547 mostly small fragments, kept in other boxes in Trinity College, were numbered and transcribed by Clarysse.

With few exceptions (e.g. **27**) the Petrie papyri were written in the Arsinoites in the second half of the third century BC. Therefore the undated texts may be attributed here to the period 260-200 BC. Translations are only given where enough text is preserved to yield a consecutive sense; mere fragments are not translated. The commentary is limited, with a special interest for the date of the texts and for prosopographical identifications. Several persons mentioned in these texts were included in *Pros. Ptol.* VIII and X and these references are picked up here again. In the meantime the texts are incorporated in the Trismegistos database and have received TM numbers, which may be useful if some of them receive an improved edition later on. All places and persons mentioned in the texts have been listed in TM.

It is a pleasure to thank here Brian McGing, who for many years kept me in touch with the Library and the manuscript room in Trinity College, and Herbert Verreth, who went through my manuscript with his usual care, saving me from numerous errors and inconsistencies. Mark Depauw was so kind as to make an online edition possible with reference to the excellent photographs provided by the Library of Trinity College.

Editorial note

For the photographs, this version published in April 2024 refers to the MS reference, ie. the so-called FF and F numbers. Eventually these items will be made available online, and DOI's will be assigned to them. In that case we will perhaps provide a new version with links to the online photographs. As things stand now, readers are advised to write to Trinity College Library for photographs.

The three fragments were joined on the basis of the handwriting. The order of the fragments is almost certain, though they do not join directly. The 10th year is no doubt that of Ptolemy III (238/237 BC) or IV (213/212 BC).

10. Τύβιος: It is unusual for an Egyptian month name to be declined. For Tybi this is the first example, but cf. the genitives Πάχωνος and Φαώφιος, listed in the *Guide to the Zenon archive* (P. L. Bat. 21), 1981, p.

209-211.

13. Anchosis is a woman's name in P. Count 18 l. 65 and P. Count 18 50 l. 239. It corresponds to *'nh=s* "may she live" (TM Nam 57), the feminine counterpart of *'nh=f*/Anchophis (TM Nam 56). The husband mentioned in l. 14 is no doubt hers and his name has disappeared in the lacuna to the right of l. 13.

Mentioned by R. Bogaert, *ZPE* 69 (1987), p. 133; Ptolemaios is listed as a banker in *Pros. Ptol.* VIII 1262b.

1. Year 25, Hathyr 28 corresponds to 13 January 222.

3-4. Poragebthis is a variant of Poregebthis/Porieuthes, demotic *P3-wr-i3bt* "the great one of the east" (TM Nam 939).

Year 4, Hathyr [.. Paid] to Ptolemaios by Al[exandros (?) - -] for guard-tax of vineyards from [- -] up to the 4th year

The text is mentioned by R. Bogaert in *ZPE* 69 (1987), p. 133; Ptolemaios is listed as a banker in *Pros. Ptol.* VIII 1262b.

Hathyr of year 4 either belongs to the reign of Ptolemy III (22 December 244 - 20 January 243 BC) or, more probably, of Philopator (16 December 218 - 10 January 217 BC).

3. Probably Ἀλ[εξάνδρου].

5. For the guard tax on vineyards, see Cl. Préaux, *L'économie royale des Lagides*, 1939, p. 182. The reading of the abbreviation is, however, doubtful; instead of ἀμ() it is possible and perhaps even preferable to read πα(). Could it be for πα(ραδείσων)?

When I receive the [] beer tax of Pyrreria [for year 00, I promise to pay from] Phamenoth until [- -]

The text is similar to P. Petrie 3 68 a (TM 7518), a *hypomnema* to the oikonomos Aristokritos, which runs (l. 3-11) ὑφίστα/μαι παραλαβὸν τὰ τε/ταρτικὰα Δίωνος / καὶ Τααράσιος διαγράψ[αι ἐ]πὶ τὴν βασιλικὴν / [τρά]πεζαν, "I promise, when I receive the *tetartika* of Dion and Taarasis, to pay to the royal bank". After ὑφίσταμαι one expects a future infinitive (τελέσειν, ταξεσθαι), and no doubt this is what should be supplied in P. Petrie 3 68a (supply διαγράψ[ειν] instead of διαγράψ[αι]) and in our fragment.

11. The formula καλῶς ἔχειν ὑπέλαβον is found 11 times in papyri.info, always in letters like here.
 12. The diminutive χωριδίων is thus far only attested in three texts from the Roman period (O. Edfou 3 379; P. Flor. 2 127 l. 9; P. Wash. Univ. 1 18 l. 15, the latter being abbreviated and therefore uncertain).
 13. In the archive of Menches, village scribe of Kerkeosiris in the late second century BC (TM Arch 140), no vineyards are attested in the village, but there may have been some in the third century BC; cf. D. J. Crawford, *Kerkeosiris in the Ptolemaic period*, 1971, p. 116.
 14. The ἔκτη, tax of 1/6, is the apomoira, the tax on vineyards (see ἀμπέλου in l. 13) and orchards (παραδείσων in l. 16), see W. Clarysse - K. Vandorpe, *The Ptolemaic apomoira*, in: *Le culte du souverain dans l'Égypte ptolémaïque au IIIe siècle avant notre ère*. Actes du colloque international, Bruxelles 10 mai 1995 (Studia Hellenistica 34), 1998, p. 5-42. It is not clear what the τρίτη, the tax of 1/3, is doing in this context.
 15. καντι must be the ending of a dative singular participle like [ἐπενέγ]καντι.

1-2. For περι ὄν [αὐτῶι ἐν]εκαλοῦ[μεν], see Chrest. Mitt. 12 l. 6 and P. Sorb. 3 127 l. 17, but the plural ἐν]εκαλοῦ[μεν] does not fit the singular [ὅπως μὴ ἀ]δικηθῶ in l. 5. A similar change from singular to plural is found in the petition published by G. Baetens, *Ancient Society* 44 (2014), p. 95 l. 3 vs. l. 10 and 13.

4. The sum of 1228 talents 3629 drachmas is enormous, even for the second century BC. It is strange, however, that the drachma figure goes down to the small figure of 29: normally in this period drachmas are multiples of 50.

4. The rare verb προσλογεύω is found in P. Cairo Zen. 2 59206 l. 66-67 and P. Hib . 1 66 l. 3.

6. The combination of a form of συντάττειν with μὴ παρενοχλεῖν is found ten times in Ptolemaic petitions, usually followed by με or ἡμᾶς, but this is the earliest example. The addressee, no doubt a name like Pane[chotes], is asked to "give order" to somebody "not to bother [us]".

8-9. The expression πεποίηκα [τὰ δίκαια τῶι βασιλεῖ "I did pay my taxes to the king", is found in P. Heid. 6 379. If the fragment belongs to **148**, the text may be dated to 2 October 213 BC, but that would imply that Athenodoros started earlier than thus far known and that is unlikely because at that time his predecessor Theogenes was still in function.

9-12. Payments are paid in three installments: the first on the last day of year 13 (13 October 209 BC), the second in Epeiph of year 14 (Aug./Sept. 208 BC) and the third on Pachons 29, probably in year 15 (9 July 207 BC).

10. Exceptionally a supralinear stroke is put over the year number here and in l. 11.

14. If the reading [Π]ρῶτος is right, this is probably the banker of that name, who was active from 211 to 204 BC (*Pros. Ptol.* I 1262 = TM Per 12765, with a new reference); this passage is quoted by R. Bogaert, *Banques et banquiers dans l'Arsinoïte à l'époque ptolémaïque*, ZPE 68 (1987), p. 66-67. The supplement shows that about 13 letters are lost between fr. a and b

1. begins with personal description. Together with the Macedonian month Panemos in l. 4 this suggests that this text is a fragment of a witness disposition like P. Cairo Zen. 3 59347 or P. L. Bat 20 21.

4. Nikanor (*Pros. Ptol.* II and VIII 2808 = X E1554) is also attested in P. Petrie² I 27 l. 3-4 (without the patronymic). He is a hundred arourai cavalryman there and also here (l. 3) and therefore λο() in l. 6 cannot stand for λο(χαγός). In the commentary to that text (p. 247) the present fragment is already edited.

5. The eponymous officer Hippokrates (*Pros. Ptol.* VIII 1921) is attested from 236 to 223 BC; see W. Clarysse - C. Fischer, *AfP* 58 (2012), p. 31-33.

6. Phoretion (cost of transport by donkey) and emblethron (cost of loading in a ship) are also found side by side in P. Petrie 3 129 passim, P. Tebt. 3 847 l. 23, P. Tebt. 3 853 l. 65-69 and P. Tebt. 3 859 l. 8-10, briefly mentioned by Cl. Préaux, *L'économie royale des Lagides*, 1939, p. 132.

7 [ἐπι]τηρήσει εν.[

1. This is not a letter: the dative without χαίρειν in the first line suggest a hypomnema to Apollonios, without the name of the sender.

2. The adverb ἀλυσιτελῶς is here attested for the first time, though the corresponding adjective ἀλυσιτελής is found in P. Cairo Zen. 3 59481 and P. Tebt. 1 68.

4. The verb ἀποδιδράσκω is uncommon in the papyri and most often used for runaway slaves, e.g. P. Cairo Zen. 1 59015 l. 19, P. Turner 41 l. 18, P. Oxy. 2 298 l. 5, P. Diosk. 9, l. 9 (with bibliography). The iota in [ἄ]ποδιδράσκου[σι] is a scribal error.

2. ἐκφθόριον is apparently an *addendum lexicis*. It could be a kind of breach in the dike, but the writing seems to be later than the Kleon archive. Given the context it is unlikely to be an error for ἐκφόρια though the expression ἀναπληρώω τὰ ἐκφόρια is attested in P. Lille 1 8 l. 14-15.

This text was discussed and partly published by R. Bogaert, *ZPE* 68 (1987), p. 66-67 (= *Trapezitica Aegyptiaca*, 1994, p. 318-320). It is probably linked to 46. Payment of a sum has to happen in four installments over at least three years (year 7 to 10). The installments are probably all of 1125 dr., which would point to a total sum of 5000 dr. The structure of the text is uniform for installments 2-4, but different for the first installment.

l. 1-8: [To Metrodoros oikonomos] from Dionysios farmer of Mouchis. I ask you urgently not to overlook me perishing in the prison, being discredited by Marres the t[oparch]. - -

Metrodoros the oikonomos is attested between 216 and 213 BC, see no. 33 with note. The supplement of l. 1 is somewhat risky, but since 73a and 73b are written in the same hand and found in the same find, it is very likely.

The toparch Marres is listed in *Pros. Ptol.* VIII 556b. Toparchs are not attested in the Arsinoites before 236 BC, which gives a *terminus post quem* for this text and the next; cf. T. Derda, *Arsinoites nomos*, 2006, p. 120.

4. The tautological ἀξιῶ δεόμενος is used for urgent requests, as in P. Polit. Iud. 2 l. 13 and SB 26 16743 l. 12, also from prisoners.

Ptol.* I and VIII 1027). His archive, dated in 226 BC, is discussed in K. Vandorpe, W. Clarysse and H. Verreth, *Graeco-Roman archives from the Fayum*, 2015, p. 111 (TM Arch 398). The text is, however, shorter than the other receipts of P. Petrie 2 25 (= P. Petrie 3 61).

85. FF 66 contains numerous fragments of a large roll. The verso is usually blank, but there are a few remnants of another account on the back of some fragments. On the verso of fr. a one can decipher the names of the villages Ἐρμοῦ πόλι[ς] and [Θε]οξενίδος. Perhaps the blottings in mirror writing on the back of fr. a may help to join some of the other fragments.

Account with substantial payments ranging from 16 dr. tot 367 dr. The sums are very detailed, going down to quarters of obols; clearly the sums are counted in silver money and a date before 210 is therefore likely. The persons paying are identified by the header in l. 1 as "the men from Alexandria". Most of them have Egyptian names, and three of the Greek named persons have an Egyptian patronymic: Protarchos son of Pais (l. 3), [Li]chas son of Pais (l. 4) and Hephaistion son of Pais (l. 8), probably a brother of Protarchos.

2-3 We have supplemented the name of the epimeletes to Σπ[αρτάκου] because an epimeletes (or two?) with that name is found in P. Tebt. 3 895 l. 122 and BASP 53 (2016), p. 35 (with note on p. 42-44, replacing *Pros. Ptol.* I 956). If the identification is right, this fragment could be dated to the first half of the second century BC.

4-5. Here follow the names of several officials who were present on the occasion: [- -]on son of Olympiodoros, [- -]menes son of Machatas and [- -]on son of (?) Achoapis the komogrammateus. In the first case the patronymic is introduced by the article in the genitive as is normal, in the second case the word υίός is inserted, in the third case the article is missing so that perhaps Achoapis is not a patronymic, but the name of the village scribe (patronymics are uncommon for officials).

6. There is only a minimal trace of the first preserved letter, enough to exclude [- -]γενου; no doubt a Greek name ending in [- -]μενης.

7-8. The supplement seems to fill the lacuna well, but the following wordθενους is uncertain: one expects the name of a village, but it rather looks like a personal name.

9. The title κομομισθότης is thus far found only in two Greek papyri: P. Tebt. 1 183 and PSI 6 554 l. 13. It is also attested in demotic transcription, cf. W. Clarysse, *Greek loan-words in demotic*, in: S. P. Vleeming, *Aspects of demotic lexicography* (Studia Demotica 1), 1987, p. 25 no. 47; W. Clarysse, *Determinatives in Greek loan words*, in: S. P. Cursive script, perhaps the same hand as P. Petrie 3 53 m (TM 7479). The cursive script and the fragmentary state of the papyrus make reading difficult.

If the dioiketes mentioned in l. 2 is indeed Chrysippos and if Mnaseas in l. 4 is the oikonomos of that name, the text should be dated around 225-222 BC.

1. No doubt this text was also addressed to the dioiketes Chrysippos, for whom see *Pros. Ptol.* I and VIII 52 and L. Mooren, *The aulic titlature in Ptolemaic Egypt*, 1975, p. 79-80 no. 040. The present fragment is probably written for the same visit of the dioiketes Chrysippos as P. Petrie 3 53 m; for this visit, see E. Lanciers, *High-ranking Ptolemaic officials visiting the chora*, *Historia* 69 (2020), p. 286. It is now filed in FF 16 with two other fragments, of which only the largest is published as P. Petrie 3 53 m.

3. The group ἡ αὐτή (scil. ἐπιστολή) suggests that this fragment belongs to a register of letters, of which the first is perhaps addressed to [Chryssippos]; a copy is then sent to Pais (l. 3) and other letters to Mnaseas (l. 4) and Pasis (l. 5). For parallels of this kind of register, see e.g. P. Lond. 7 2188 l. 176, P. Tebt. 3 730 l. 6 and 746 l. 38.

4. Since this fragment is linked with the dioiketes Chryssippos, Mnaseas may well be the oikonomos of that name (*Pros. Ptol.* I 1063), who was in function around the same time (222 BC).

Similar hypomnemata to Metrodoros are **33**, **73a** and **73b**. These seem to form a small archive of petitions. He is no doubt identical with Metrodoros *Pros. Since Metrodoros is attested in Philadelpheia (P. Lille 1 3) and in Athenas kome (meris of Themistos) he was in charge of the whole Arsinoite nome.

6. Philadelphieios is certainly the Alexandrian deme of that name (TM Geo 1763), cf. P. M. Fraser, *Ptolemaic Alexandria*, II, 1972, p. 124 n. 71. Λύσιος may be either the name or the patronymic (Lysis) of this Alexandrian.

A transcription of a fragment written in the same hand is given by Smyly in cahier R.2.8.21. Since the original is now lost, it is difficult to know whether the hand is really the same. This text looks like an official letter (with a date at the end).

this fragment probably belongs to **P. Petrie 3 98**: the payments per aroura are similar, both texts mention cows and donkeys and there are traces of similar paint on the back.

P. Petrie 3 98 refers to a 17th year, 231/230 BC rather than 206/205 BC or 269/268 BC.

 The text containing extracts of laws on (false) witnesses in court proceedings was published by Smyly in the introduction to *P. Gurob 2* (p. 17-18), and studied by H. J. Wolf, *Das Justizwesen der Ptolemäer*, 1970, p. 24-27. Smyly's text is reproduced by Wolf and hence included in SB 10 10494. The supplements are based on the well-preserved text of P. Hal. 1 l. 24-45 and l. 55-56, which offer a complete text. Our edition incorporates the corrections of D. Kaltsas in P. Heid. 8, 2001, p. 11-12 notes 5 and 6 (BL 12, p. 204).

of the small terrass should also be given wine jars. If you agree, please write so that also the expense for the cleaning and building be given. Respectfully.

After some hesitation this text was not included in the Kleon archive, because it gives the impression of being a private matter rather than public building. The combination of the formula καλῶς ποιήσεις (l. 12-13) with εὐτύχει (l. 17) is unexpected.

3. The substantive ὑπερβατόν seems thus far only attested in the expression ἐξ ὑπερβατῶν, used for burglars who enter a house "from a point where ingress was possible" (P. Ryl. 2 138 l. 16; SB 12 11008 l. 9; SB 20 14679 l. 9, all Roman period). The meaning here, perhaps part of a building built over other parts, is unclear.

There is some illegible writing on the back; the only line I can read is at the end of col. 1:

small cursive script; the reading is difficult because of the plaster.

The 7th year (l. 7) is either that of III Euergetes (241/240 BC) or that of IV Philopator (216/215 BC).

2. A tetradrachm normally corresponds to 24 obols; here it is counted as 26 (bronze) obols, with an agio of 10 %, cf. K. Maresch, *Bronze und Silber*, 1996, p. 2 and 89.

3. Φιλάρυος: the reading is almost certainly wrong.

6. A kleros of Menelaos is possibly attested in the meris of Themistos (CPR 1 176 l. 13) (TM Geo 1357) and in the meris of Polemon (P. Tebt. 3 799 l. 14-15) (TM Geo 14298), but the dynastic name Menelaos is frequent among cleruchs.

The recto clearly deals with grain transport by boat. The boats are of the type prosagogis (l. 11) and all belong to the same owner Are. . . [, whose name is lost in the lacuna (l. 11). Then follows the capacity of the boat (lost in l. 11), the name of the captain and the amount of artabas loaded (this figure is lost at the end of the lines). Apollonios, Horos I, Oaphres and Horos II are captains each on a different boat. The capacity of the boats seems to be in each case 3800 artabas; for the prosagogis, see P. Erasm. II, 1991, p. 79 and P. Arnaud, *La batellerie de fret nilotique* in: P. Pomey (ed.), *La batellerie égyptienne. Archéologie, histoire, ethnographie* (Études alexandrines 34), 2015, p. 117-119.

2-7. The expenses for cleaning are 2%, that for sifting 1%, as is usual in the state granary, cf. Cl. Préaux, *L'économie royale des Lagides*, 1939, p. 132 n. 3 and A. Monson, in: S. Lippert e.a., *Sapientia Felicitas. Fs. Vittmann*, 2016, p. 433-438. Amounts of less than $\frac{1}{12}$ are not counted.

The account is summarized in the following table:

		misthosis	katharsis	koskineutikon	kath. + kosk.	total
l. 2	Thoth	$9 \frac{5}{12}$	$\frac{1}{12}$	$\frac{1}{12}$	$\frac{1}{6}$	9 [$\frac{7}{12}$]
l. 3	Phaophi	2	$\frac{1}{12}$	-	-	$2 \frac{1}{12}$
l. 4	Hathyr	$229 \frac{1}{12}$	$4 \frac{7}{12}$	$2 \frac{1}{4}$	$6 \frac{5}{6}$	[235 $\frac{11}{12}$]

l. 6	Tybi	$1 \frac{2}{3}$	$\frac{1}{12}$	-	-	1 [$\frac{3}{4}$]
l. 7	total	$336 \frac{1}{4}$	$6 \frac{2}{3}$	$2 \frac{3}{4}$	[9 $\frac{5}{12}$]	[345 $\frac{2}{3}$]

The largest amounts by far are paid in Hathyr and Choiach (December and January). This is surprising as the harvest in the Fayum took place in Phamenoth and Pharmouthi (April-May) and rents on grain land were usually paid in May. Probably threshing took some time and the payments are with the harvest of the preceding year.

9-11. Here three minor taxes are listed: thesauophylakitikon (tax for protection of the granary), grammatikon (scribal fee) and phylakitikon (police tax). For these taxes, see Cl. Préaux, *L'économie royale des Lagides*, 1939, p. 131-132. It is unclear why no payments are listed for Hathyr.

10	Choiach	5	4/16	9 1/6

12-18. Here are listed the payments for *ekphorion*. *Misthosis* and *ekphorion*, both translated as "rent" in English, are here apparently two different categories; for *ekphorion*, see now A. Monson, *From the Ptolemies to the Romans*, 2012, p. 165. The right part of the papyrus is damaged at this point and therefore the figures are to a large extent restored.

P. Vanaverbeke, *Bijdrage tot de studie van de P. Petrie ined.*, 1968, p. 33-43 (listed as R.2.9 122).

original not found in Dublin by Clarysse in 1972; the transcription here, like that of Vanaverbeke, is based on Smyly's notebook.

This is apparently a court sentence (l. 1-2), preceded by a complaint of a woman against an opponent who has beaten her in her own house (l. 2-11). She brings forward at least one witness, a certain Dionysios (l. 22-24). The formulas used show that the case was treated by the Greek court (κληρωτὸν δικαστήριον), for which see now P. Trier 1, 2017, p. 4-53, which replaces H. J. Wolff, *Das Justizwesen der Ptolemäer* (Münchener Beiträge 44), 1962, p. 3-47, and offers a list of similar texts (p. 8). The supplements for the present fragmentary text are mainly based on P. Gurob 2 (TM 5865), which also deals with a quarrel and physical violence, whereas the Trier texts deal with unfulfilled loan contracts. The 19th year (l. 24) is no doubt that of Ptolemy III, i.e. 219/218 BC, though the eponymous priests do not fit other texts of that year.

7 and 18. We consider οἴου as an erroneous writing of οὐδοῦ "threshold" because ὁδός "road" is feminine.

11. The penalty, for which see also P. Köln 14 561 l. 16-17 note, is here estimated at 100 dr. It is not clear
how this relates to the 600 drachmae of l. 16.

12-13. The names of the eponymous Alexander priest and the kanephoros are only partially preserved, but
they are different from those listed in W. Clarysse - G. Van der Veken, *The eponymous priests*, 1983 p. 12-
13 no. 61 and 62 for the 19th year of Euergetes. Metrophanes is attested as father of the kanephoros Eirene
in 208 BC (Clarysse - Van der Veken no. 82), but there need not be a family connection. The father of the
eponymous priest is [Paus]anias or [Lys]anias or sim.

13-14. In the texts dealing with the Greek dikasterion the Macedonian calendar is used throughout, sometimes
in combination with the Egyptian months, cf. P. Köln 14 561 l. 22 note.

14. The written complaint (ἔγκλημα) was handed over by the plaintiff to the accused in the presence of two
witnesses, called κλήτορες, cf. E. Berneker, *Zur Geschichte der Prozesseinleitung im ptolemäischen Recht*,
1930, p. 59, P. Heid. 8 412 l. 19 note and P. Trier 1 2 l. 35 note. The name of the first of them is partially
preserved.
